PERSONAL STATEMENT

A Web Developer on the journey to become a full stack developer. Focusing on a logical and accessible approach to current problems. Technologically competent and fascinated with current strides in the industry.

Keeping organised throughout education and whilst in employment, task and time management are essential attributes that allow me to excel within my position. I'm able to work independently and use initiative, willing to undertake any training necessary to develop further.

EXPERIENCE

| | |
|---|---|
| ● | Web Developer <i>Newable</i> August 2021 - Current London, UK (Hybird) Working closely with design agencies and building templates from given designs. Researching/Implementing best working practices. Using CMS (WordPress) and Plugins (ACF) to make dynamic content easier for marketing. Using Laravel framework to combine frontend/scsss frameworks as well as wordpress to create consistency among all group websites and intranets. Using Salesforce to ensure web development time is appropriately distributed. As well web associated issues/tickets being attended to promptly. Ensuring robust code has been written by taking extra time to run/write Unit Tests. Peer Review and Refactoring (where applicable) Keeping on top of multiple project/branches using GIT. Deploying to development/live when appropriate. Department/Management run throughs (with QA about projects) Regularay take time to improve coding skills from researching new or keeping up to date with technologies/frameworks. Putting togeater a case to show how it will improve workflow annd benifit the team. Using industry leading API/Webhooks (Docusign, GoCardless) to create a seamless transition for clients. From point of signing documentation to generating mandate requests. |
| ● | Junior Web Developer / Designer / Animator <i>Falcon Group</i> July 2019 - October 2020 London, UK Overseeing all clients facing digital spaces and transitioning/migrating websites to different hosting platforms/CMSs. Manage the relationship with multiple registrars and hosting companies; for each company, documents put together for financial control/projection, risks and issues. Initiatives put in place to decrease cost, mitigate risk improve service. Developing concepts, graphics and layouts for product illustrations, company events stands and websites. Took full ownership of development tasks and projects. Send up bi-weekly analytical reports on traffic and develop ways to improve on this. Working directly with senior management and the chairman to ensure time sensitive projects are completed. |
| ● | Airport Technician <i>ESP Global Services</i> May 2017 - January 2019 Essex, UK Carry out regular routine and preventative maintenance as well as "floor-walking" on the range of IT equipment. (contracts include, Airport CUTE, UKBF, PULSE) Maintain a high level of communication at all times with colleagues and provide timely updates to the Global Service Desk. Respond to all customer incidents and service requests passed across by the Global Service Desk and work to agreed SLAs. Install, configure and update new systems provided to the airport via SITA. Alternatively known as the airport refresh project |
